

TRAVEL VACCINATIONS

In addition to routine childhood vaccinations, it is important for children to have the recommended vaccinations if they are travelling outside of Canada. Some vaccinations require a more than one dose so it is important to book your travel clinic appointment a few months before your planned travel.

For information from AHS on travel vaccinations and clinic locations, please check out:

- <https://www.albertahealthservices.ca/services/page13244.aspx>

For the most update recommendations for travel vaccinations by countries, please check out:
